

DOUBLE MMK

MANAGEMENT LLC

Website — What We Need From You

The site is built and polished. To make it unmistakably Double MMK's — and to switch the contact forms on — here's everything to send. Tier 1 is what actually takes the site live.

★ Tier 1 — Needed to launch

☐ 1. Turn the forms on (2 minutes)

Go to web3forms.com, enter **Doublemmkmanagement@gmail.com**, and it emails you an access key. Send that key over — leads then go straight to the Gmail inbox.

☐ 2. Real reviews (3–6)

Copy/paste 3–6 real client quotes (Google reviews are ideal). For each: the quote, the person's **first name + last initial**, and a short tag ("Owner, 4 units"). Include your Google Business Profile link if you have one.

☐ 3. Owner photo (high resolution)

One clear headshot of Mohamad — at least 1000×1000px, larger is better.

☐ 4. A few real property photos

Even 4–6 real photos beat the illustrations. 8–12 horizontal photos, at least 1600px wide, JPG. Exteriors + a few interiors (kitchen, living room, bath). Note the address/neighborhood for each if relevant.

☐ 5. Confirm the business facts

Real **office address** (or confirm "by appointment"), **license/registration #**, exact **business hours** (now Mon–Fri 9–5), and confirm the **service-area** neighborhood list.

☐ 6. Confirm the numbers

OK to keep these, or give real ones: **500+ units, 98% occupancy, 21 days avg. to lease, 4.9★**. Pricing on the Owners page: **50% of one month's rent** (lease-up) and **8% of monthly rent** (management). Also glance at the rent-calculator ranges and tell us if they feel right.

Tier 2 — Makes it fuller

☐ 7. Landlord Studio link(s)

Your resident-portal URL so the **Pay Rent** and **Log In** buttons work.

☐ 8. Real rental listings

For each available rental: address/neighborhood, rent, beds, baths, square footage, and photos.

☐ 9. Social media

Facebook, Instagram, and/or LinkedIn page URLs (footer icons currently link nowhere).

☐ 10. Analytics (free, recommended)

Create a free **Microsoft Clarity** and/or **Google Analytics** account and send the ID — so we can see how visitors use the site.

☐ 11. Domain + brand files

Confirm the domain (we've assumed **doublemmk.com**) and send any official logo files you want used.
